

Drawings and watercolours for graphic representation subjects. Collections of plates of some series have been published: works by Gaudí, the Alhambra in Granada, the facades of the Rambles in Barcelona and historic buildings of the Barcelona Provincial Council.

This collection features the series of drawings of the period in which Francisco P. Nebot i Torrens as a professor and Josep M. Jujol i Gibert as an acting professor taught the subjects “Details” (1914-1932) and “Copying Architectural Elements” (1933-1945). The drawings reproduce architectural details such as doors, capitals, reliefs, tombstones, coats of arms, floor slabs, tiles and stained glass. Many have very elaborate calligraphy and some are signed or have notes by Josep Maria Jujol.

## 5. Collection of academic materials of the ETSAB.

Drawing (1871-2009)
